Schedule V
Independence Realty Trust, Inc.
Definitions

Average Effective Monthly Rent per Unit

Average effective rent per unit represents the average of gross rent amounts, divided by the average occupancy (in units) for the period presented. We believe average effective rent is a helpful measurement in evaluating average pricing. This metric, when presented, reflects the average effective rent per month.

Average Occupancy

Average occupancy represents the average of the daily physical occupancy for the period presented.

Adjusted EBITDA

EBITDA is defined as net income before interest expense including amortization of deferred financing costs, income tax expense, and depreciation and amortization expenses. Adjusted EBITDA is EBITDA before certain other non-cash or non-operating gains or losses related to items such as acquisition and integration expenses, asset sales, debt extinguishments and acquisition related debt extinguishment expenses. EBITDA and Adjusted EBITDA are each non-GAAP measures. We consider each of EBITDA and Adjusted EBITDA to be an appropriate supplemental measure of our performance because it eliminates interest, income taxes, depreciation and amortization, and other non-cash or non-operating gains and losses, which permits investors to view income from operations without these non-cash or non-operating items. IRT's calculation of Adjusted EBITDA differs from the methodology used for calculating Adjusted EBITDA by certain other REITs and, accordingly, IRT's Adjusted EBITDA may not be comparable to Adjusted EBITDA reported by other REITs.

Funds From Operations ("FFO") and Core Funds From Operations ("CFFO")

IRT believes that FFO and CFFO, each of which is a non-GAAP measure, are additional appropriate measures of the operating performance of a REIT and IRT in particular. IRT computes FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts, or NAREIT, as net income or loss (computed in accordance with GAAP), excluding real estate-related depreciation and amortization expense, gains or losses on sales of real estate and the cumulative effect of changes in accounting principles.

CFFO is a computation made by analysts and investors to measure a real estate company's operating performance by removing the effect of items that do not reflect ongoing property operations, including stock compensation expense, depreciation and amortization of other items not included in FFO, amortization of deferred financing costs, acquisition and integration expenses, and other non-cash or non-operating gains or losses related to items such as defeasance costs we incur when we sell a property subject to secured debt, asset sales, debt extinguishments, and acquisition related debt extinguishment expenses from the determination of FFO.

IRT's calculation of CFFO differs from the methodology used for calculating CFFO by certain other REITs and, accordingly, IRT's CFFO may not be comparable to CFFO reported by other REITs. IRT's management utilizes FFO and CFFO as measures of IRT's operating performance, and believes they are also useful to investors, because they facilitate an understanding of IRT's operating performance after adjustment for certain non-cash or non-operating items that are required by GAAP to be expensed but may not necessarily be indicative of current operating performance and that may not accurately compare IRT's operating performance between periods. Furthermore, although FFO, CFFO and other supplemental performance measures are defined in various ways throughout the REIT industry, IRT believes that FFO and CFFO may provide IRT and our investors with an additional useful measure to compare IRT's financial performance to certain other REITs. Neither FFO nor CFFO is equivalent to net income or cash generated from operating activities determined in accordance with GAAP. Furthermore, FFO and CFFO do not represent amounts available for management's discretionary use because of needed capital replacement or expansion, debt service obligations or other commitments or uncertainties. Neither FFO nor CFFO should be considered as an alternative to net income as an indicator of IRT's operating performance or as an alternative to cash flow from operating activities as a measure of IRT's liquidity.

Interest Coverage

Interest coverage is a ratio computed by dividing our Adjusted EBITDA by our interest expense.

Net Debt

Net debt, a non-GAAP measure, equals total debt less cash and cash equivalents. The following table provides a reconciliation of total debt to net debt (Dollars in thousands).

IRT presents net debt because management believes it is a useful measure of IRT's credit position and progress toward reducing leverage. The calculation is limited in that IRT may not always be able to use cash to repay debt on a dollar for dollar basis.

Net Operating Income

IRT believes that Net Operating Income ("NOI"), a non-GAAP measure, is a useful measure of its operating performance. IRT defines NOI as total property revenues less total property operating expenses, excluding interest expenses, depreciation and amortization, acquisition expenses, property management expenses, and general and administrative expenses. Other REITs may use different methodologies for calculating NOI, and accordingly, our NOI may not be comparable to other REITs. We believe that this measure provides an operating perspective not immediately apparent from GAAP operating income or net income. We use NOI to evaluate our performance on a same store and non-same store basis because NOI measures the core operations of property performance by excluding corporate level expenses, financing expenses, and other items not related to property operating performance and captures trends in rental housing and property operating expenses. However, NOI should only be used as an alternative measure of our financial performance.

Same Store Properties and Same Store Portfolio

IRT reviews its same store portfolio at the beginning of each calendar year. Properties are added into the same store portfolio if they were owned at the beginning of the previous year. Properties that are held-for-sale or have been sold are excluded from the same store portfolio.

Total Gross Assets

Total Gross Assets equals total assets plus accumulated depreciation and accumulated amortization, including fully depreciated or amortized real estate and real estate related assets. The following table provides a reconciliation of total assets to total gross assets (Dollars in thousands).

	As of				
	March 31, 2018	December 31, 2017	September 30, 2017	June 30, 2017	March 31, 2017

DEFINITIONS

Average Effective Monthly Rent per Unit

Average effective rent per unit represents the average of gross rent amounts, divided by the average occupancy (in units) for the period presented. We believe average effective rent is a helpful measurement in evaluating average pricing. This metric, when presented, reflects the average effective rent per month.

Average Occupancy

Average occupancy represents the average of the daily physical occupancy for the period presented.

Adjusted EBITDA

EBITDA is defined as net income before interest expense including amortization of deferred financing costs, income tax expense, and depreciation and amortization expenses. Adjusted EBITDA is EBITDA before certain other non-cash or non-operating gains or losses related to items such as acquisition and integration expenses, asset sales, debt extinguishments and acquisition related debt extinguishment expenses. EBITDA and Adjusted EBITDA are each non-GAAP measures. We consider each of EBITDA and Adjusted EBITDA to be an appropriate supplemental measure of our performance because it eliminates interest, income taxes, depreciation and amortization, and other non-cash or non-operating gains and losses, which permits investors to view income from operations without these non-cash or non-operating items. IRT's calculation of Adjusted EBITDA differs from the methodology used for calculating Adjusted EBITDA by certain other REITs and, accordingly, IRT's Adjusted EBITDA may not be comparable to Adjusted EBITDA reported by other REITs.

Funds From Operations ("FFO") and Core Funds From Operations ("CFFO")

IRT believes that FFO and CFFO, each of which is a non-GAAP measure, are additional appropriate measures of the operating performance of a REIT and IRT in particular. IRT computes FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts, or NAREIT, as net income or loss (computed in accordance with GAAP), excluding real estate-related depreciation and amortization expense, gains or losses on sales of real estate and the cumulative effect of changes in accounting principles.

CFFO is a computation made by analysts and investors to measure a real estate company's operating performance by removing the effect of items that do not reflect ongoing property operations, including stock compensation expense, depreciation and amortization of other items not included in FFO, amortization of deferred financing costs, acquisition and integration expenses, and other non-cash or non-operating gains or losses related to items such as defeasance costs we incur when we sell a property subject to secured debt, asset sales, debt extinguishments, and acquisition related debt extinguishment expenses from the determination of FFO.

IRT's calculation of CFFO differs from the methodology used for calculating CFFO by certain other REITs and, accordingly, IRT's CFFO may not be comparable to CFFO reported by other REITs. IRT's management utilizes FFO and CFFO as measures of IRT's operating performance, and believes they are also useful to investors, because they facilitate an understanding of IRT's operating performance after adjustment for certain non-cash or non-operating items that are required by GAAP to be expensed but may not necessarily be indicative of current operating performance and that may not accurately compare IRT's operating performance between periods. Furthermore, although FFO, CFFO and other supplemental performance measures are defined in various ways throughout the REIT industry, IRT believes that FFO and CFFO may provide IRT and our investors with an additional useful measure to compare IRT's financial performance to certain other REITs. Neither FFO nor CFFO is equivalent to net income or cash generated from operating activities determined in accordance with GAAP. Furthermore, FFO and CFFO do not represent amounts available for management's discretionary use because of needed capital replacement or expansion, debt service obligations or other commitments or uncertainties. Neither FFO nor CFFO should be considered as an alternative to net income as an indicator of IRT's operating performance or as an alternative to cash flow from operating activities as a measure of IRT's liquidity.

Interest Coverage

Interest coverage is a ratio computed by dividing our Adjusted EBITDA by our interest expense.

Net Debt

Net debt, a non-GAAP measure, equals total debt less cash and cash equivalents. The following table provides a reconciliation of total debt to net debt (Dollars in thousands).

	As of				
	March 31, 2018	December 31, 2017	September 30, 2017	June 30, 2017	March 31, 2017
Total debt	\$ 903,286	\$ 778,442	\$ 731,625	\$ 764,521	\$ 765,695
Less: cash and cash equivalents	(10,399)	(9,985)	(10,128)	(6,271)	(10,065)
Total net debt	<u>\$ 892,887</u>	<u>\$ 768,457</u>	<u>\$ 721,497</u>	<u>\$ 758,250</u>	<u>\$ 755,630</u>

IRT presents net debt because management believes it is a useful measure of IRT's credit position and progress toward reducing leverage. The calculation is limited in that IRT may not always be able to use cash to repay debt on a dollar for dollar basis.

Net Operating Income

IRT believes that Net Operating Income ("NOI"), a non-GAAP measure, is a useful measure of its operating performance. IRT defines NOI as total property revenues less total property operating expenses, excluding interest expenses, depreciation and amortization, acquisition expenses, property management expenses, and general and administrative expenses. Other REITs may use different methodologies for calculating NOI, and accordingly, our NOI may not be comparable to other REITs. We believe that this measure provides an operating perspective not immediately apparent from GAAP operating income or net income. We use NOI to evaluate our performance on a same store and non-same store basis because NOI measures the core operations of property performance by excluding corporate level expenses, financing expenses, and other items not related to property operating performance and captures trends in rental housing and property operating expenses. However, NOI should only be used as an alternative measure of our financial performance.

Same Store Properties and Same Store Portfolio

IRT reviews its same store portfolio at the beginning of each calendar year. Properties are added into the same store portfolio if they were owned at the beginning of the previous year. Properties that are held-for-sale or have been sold are excluded from the same store portfolio.

Total Gross Assets

Total Gross Assets equals total assets plus accumulated depreciation and accumulated amortization, including fully depreciated or amortized real estate and real estate related assets. The following table provides a reconciliation of total assets to total gross assets (Dollars in thousands).

	As of
